

This Morning, August 31st

—the number of dealers carrying stocks of United States Tires is 98 per cent. greater than at this time two years ago.

One out of every four reputable tire dealers in this country is now a United States Tire Sales and Service Depot Dealer.

This—in spite of the fact that there are over 300 different makes of tires.

The reason is—

Dealers know tires. Also—they know the make of tires that most motorists want.

**United States Tires
are Good Tires**
